

ABOUT

The Wellness Corner

Our focus at The Wellness Corner is to provide quality compounded preparations at the highest level of purity and accuracy. Our experienced pharmacy staff individually prepares custom-tailored solutions for each of a physician's patients according to their prescription and fulfills each compound with precision. As a 503A pharmacy, we are a leader in compliance and quality standards with our strict adherence to the USP <797> requirements and our own strict self-imposed standards.

We distinguish ourselves with dedicated and qualified staff members that commit to our patient-centered culture and continuous personnel training on USP <797> standards. We aim to be your safe, accurate, and effective compounding pharmaceutical solution.

Sterile intrathecal products are expertly prepared to meet the needs of each individual patient and are compounded individually according to the physician's prescription.

Quality Product

A highly qualified pharmacist prepares each compound in a temperature, pressure, and humidity-controlled ISO validated, USP <797> compliant cleanroom.

Customer Service

You will have a dedicated representative that is in constant communication with you via text, email, or phone. You will know who is filling each prescription.

Sterile Standards

We perform surface microbial testing on a daily basis to ensure sterility and use an independent tester to certify our cleanroom biannually. Each pharmacist is strictly monitored for aseptic techniques and is subject to routine compound sterility and accuracy testing.

ABOUT

Intrathecal Compounds

Intrathecal compounds are custom prepared medicine solutions that are used to relieve severe and chronic pain. This high-risk medical procedure is solely based on a physician's discretion and requires expert preparation and administration.

Strict guidelines are followed when intrathecal compounds are being prepared to meet quality, safety, and accuracy standards. We adhere to government standards as well as our own self-imposed standards to ensure quality compliance.
